IMPORTANT

The Cargo Case must be properly installed and securely attached to your vehicle. Failure to properly secure the mounts and cases to your vehicle could result in serious injury or even death.

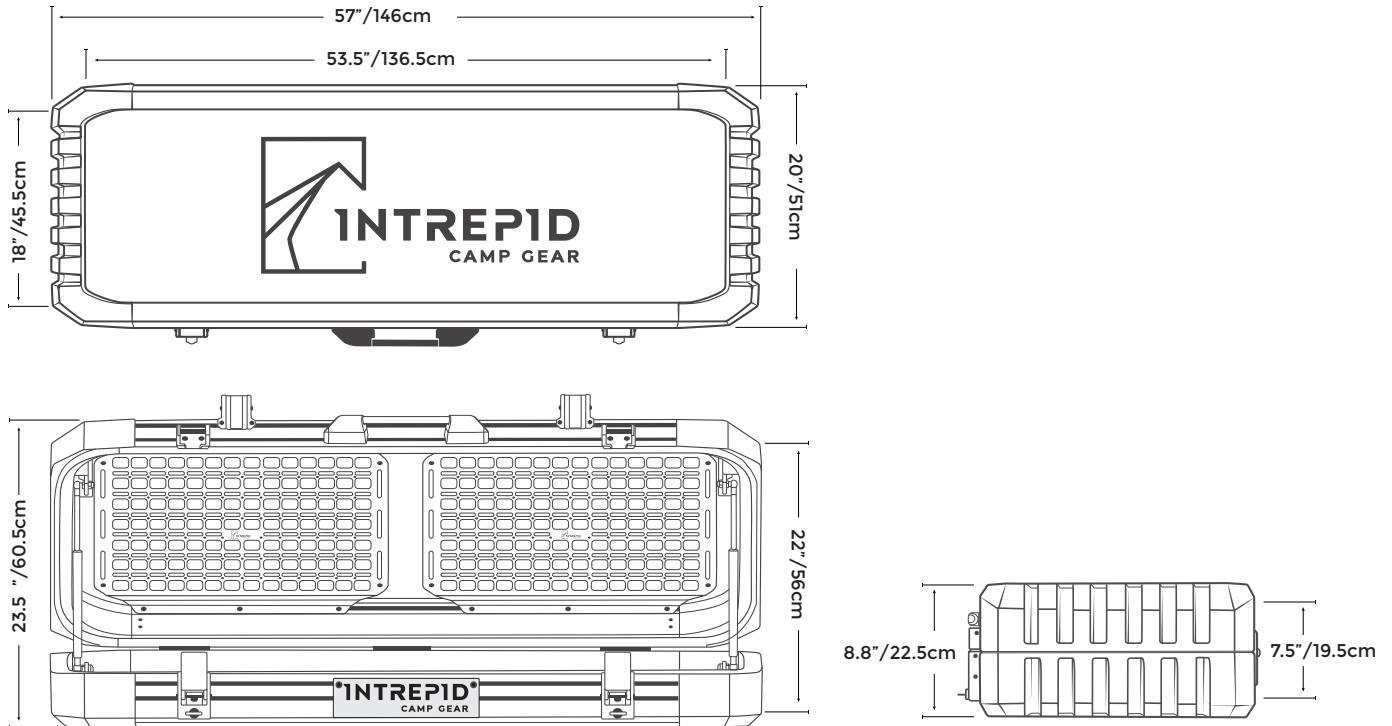

Be sure to check the hardware after 10-20 miles after installation and after every trip off road to be sure it's still secured.

We are not perfect, but we strive to be the best. Your feedback and improvement ideas will help us to reach this goal. Follow the setup instructions to get started, and if you need any help along the way, email us at support@intrepidcampgear.com.

4. Torx T30IP for bolt M13
Slim combination spanner | x1
x1

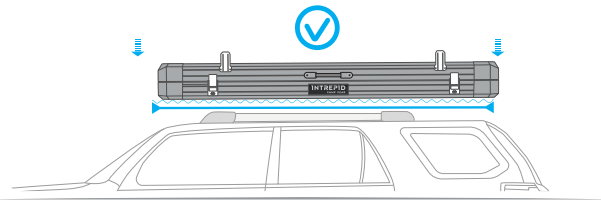

5. Handle + Bolts + Spring washer | x1 set

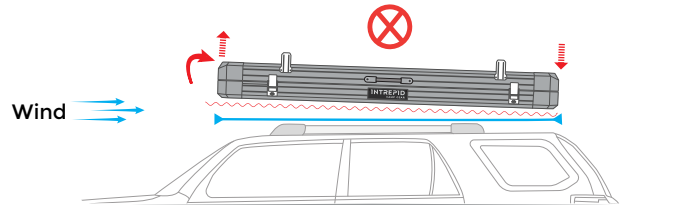

6. Logo Plate | x1 set

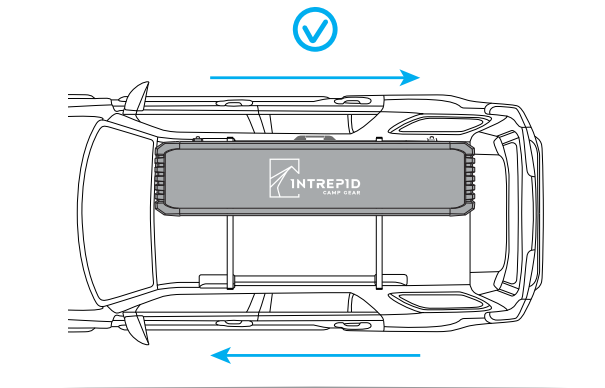

CARGO CASE INSTALLATION

Parallel with the crossbar.

Back side down (drag force).

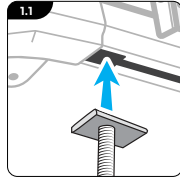

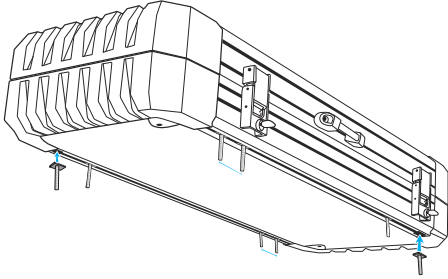

Parallel with the vehicle's body.

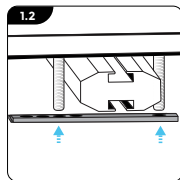

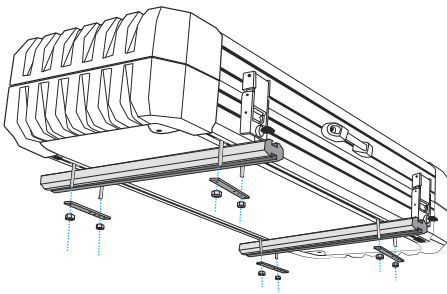

For optimal accessibility, we recommend mounting the Cargo Case at the edge of the vehicle's roof, parallel to it's body.

HARDWARE PREPARATION

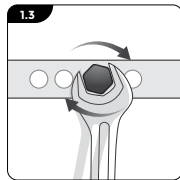

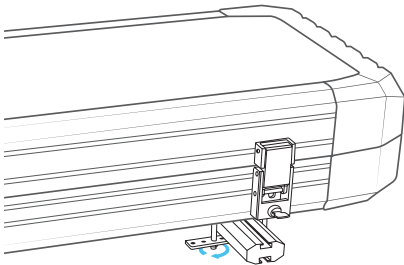

1 INSTALL BOTTOM RAIL

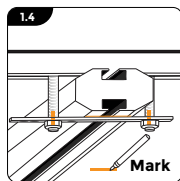

Insert x4 M8 bolts into the groove of the bottom side.

Adjust x2 M8 bolts on the 2 sides of the cross bar as the picture shows.

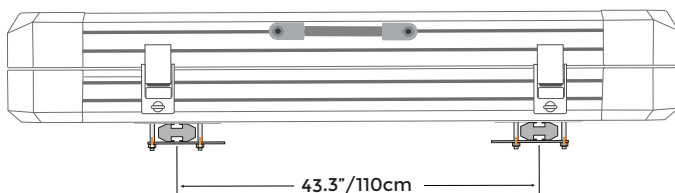

Attach Mounting Plate to M8 Bolts. Utilize the narrowest hole spacing allowed by your crossbar.

Tighten M8 Nuts until the mounting plate bends 5°-15°. Marking the bolt position as shown in the picture will help for future reattachment and to monitor the hardware.

ITX120 CARGO CASE 120L:

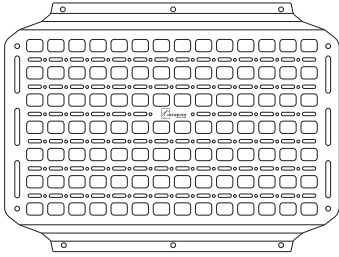

ITX190 CARGO CASE 190L:

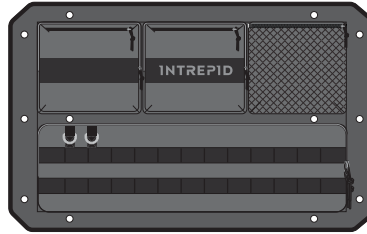

Note: Hand tools are recommended to prevent nut and bolt from seizing.

PART LIST

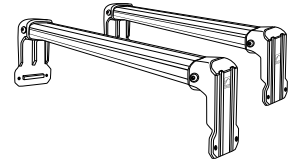

ACCESSORIES (SOLD SEPERATLEY)

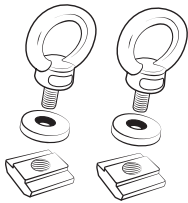

1. ITX Molle Panel

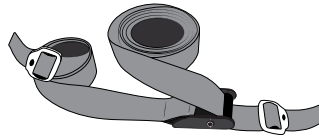

2. ITX Lid Organizer

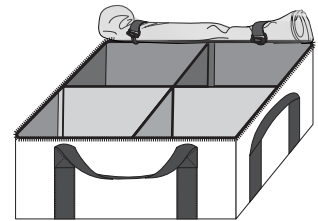

3. Cross Mount

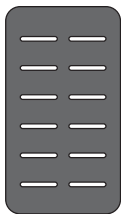

4. Eye Bolt & Kit

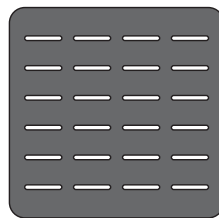

5. ITX Tie Down Strap

5 INSTALL ITX TIE DOWN STRAP

Wrap the strap securely around the item you want to secure. Ensure it's wrapped tightly and evenly.

CARGO CASE CARE AND SAFETY

CARGO CASE CARE:

- When not in use, store your aluminum Cargo Case in a cool, dry place out of direct sunlight.
- You can clean your aluminum cargo case with a mild soap and water. Avoid using harsh chemicals or abrasive cleaners, as these can damage the aluminum.

SAFETY:

- Always ensure that the latches and clasps are securely fastened before transporting or storing the case.
- Check hardware after 10-20 miles of initial driving and after every trip offroad to ensure every connection is secured.
- Gas struts are NOT to be used as handles. Doing so may cause gas struts to bend or gas leaking. Breaks of this kind are user error, not covered by our warranty policy.
- Keep gas struts rod away from dust as dust and rust may cause gas leakage.
- Before each camping season, or after prolonged use, be sure to check all the screws underneath the cargo case along the frame. Screws might be loosen over time due to vibration and gravity. Screws should be snug; but not overtightened. If you have any concerns please contact customer service at Intrepid Camp Gear.
